Dear Sir/Madam,

**Government launches Preparedness and Response Plan
for Novel Infectious Disease of Public Health Significance**

The Government, on January 4, launched the Preparedness and Response Plan for Novel Infectious Disease of Public Health Significance (The Plan). In parallel, the Serious Response Level was activated with immediate effect.

The Plan sets out the Government's preparedness and response plan in case of an outbreak of Novel Infectious Disease of Public Health Significance. A three-tier response level is adopted in the plan. Three response levels, namely Alert, Serious and Emergency, will be activated based on the risk assessment of the Novel Infectious Disease of Public Health Significance that may affect Hong Kong and its health impact on the community.

Upon the risk assessment of the cluster of cases of viral pneumonia with unknown cause in Wuhan reported by the National Health Commission, the Serious Response Level was activated. Under the Serious Response Level, the immediate health impact caused by Novel Infectious Disease of Public Health Significance on local population is moderate.

Please access the links below for the details of the press release:

A dedicated webpage (www.chp.gov.hk/en/features/102465.html) has been set up to provide relevant information and health advice. To address the public's concern, the Centre for Health Protection (CHP) will announce the details of cases reported under enhanced surveillance on the above webpage daily to enhance transparency.

To prevent pneumonia and respiratory tract infection, members of the public should maintain good personal and environmental hygiene. They are advised to:

- Perform hand hygiene frequently, especially before touching the mouth, nose or eyes; after touching public installations such as handrails or door knobs; or when hands are contaminated by respiratory secretion after coughing or sneezing;
- Wash hands with liquid soap and water, and rub for at least 20 seconds. Then rinse with water and dry with a disposable paper towel or hand dryer. If hand washing facilities are not available, or when hands are not visibly soiled, hand hygiene with 70 to 80 per cent alcohol-based handrub is an effective alternative;
- Cover your mouth and nose with tissue paper when sneezing or coughing. Dispose of soiled tissues into a lidded rubbish bin, then wash hands thoroughly; and
- When having respiratory symptoms, wear a surgical mask, refrain from work or attending class at school, avoid going to crowded places and seek medical advice promptly.

The public should take heed of the health advice below when travelling outside Hong Kong:

- Avoid touching animals (including game), poultry/birds or their droppings;
- Avoid visiting wet markets, live poultry markets or farms;
- Avoid making close contact with patients, especially those with symptoms of acute respiratory infections;
- Never consume game meat and patronise food premises where game meat is served;
- Adhere to food safety and hygiene rules such as avoiding consuming raw or undercooked animal products, including milk, eggs and meat, or foods which may be contaminated by animal secretions, excretions (such as urine) or contaminated products, unless they have been properly cooked, washed or peeled;
- if feeling unwell when outside Hong Kong, especially if having a fever or cough, wear a surgical mask, inform the hotel staff or tour escort and seek medical advice at once; and

- after returning to Hong Kong, consult a doctor promptly if having a fever or other symptoms, inform the doctor of recent travel history and wear a surgical mask to help prevent spread of the disease.

----- Attached please kindly find the latest version (as of 6 Jan 2020) of a pamphlet “Prevent pneumonia and respiratory tract infection”.

Please draw the attention of the patrons and staff of your premises to the above. Please also pay attention to further updates may be available from the websites of the CHP and this office. Thank you for your support.

Yours faithfully,

(Signed)
(Mrs Alison WONG)

Prevent pneumonia and respiratory tract infection

Travel advice

The public should take heed of the preventive measures below when travelling outside Hong Kong:

- Avoid touching animals (including game), poultry/birds or their droppings;
- Avoid visiting wet markets, live poultry markets or farms;
- Avoid making close contact with patients, especially those with symptoms of acute respiratory infections;
- Never consume game meat and patronise food premises where game meat is served;
- Adhere to food safety and hygiene rules such as avoiding consuming raw or undercooked animal products, including milk, eggs and meat, or foods which may be contaminated by animal secretions, excretions (such as urine) or contaminated products, unless they have been properly cooked, washed or peeled;
- If feeling unwell when outside Hong Kong, especially if having a fever or cough, wear a surgical mask, inform the hotel staff or tour escort and seek medical advice at once; and
- After returning to Hong Kong, consult a doctor promptly if having a fever or other symptoms, inform the doctor of recent travel history and wear a surgical mask to help prevent spread of the disease.

Health advice

To prevent pneumonia and respiratory tract infection, members of the public should maintain good personal and environmental hygiene. They are advised to:

- Perform hand hygiene frequently, especially before touching the mouth, nose or eyes; after touching public installations such as handrails or door knobs; or when hands are contaminated by respiratory secretion after coughing or sneezing;
- Wash hands with liquid soap and water, and rub for at least 20 seconds. Then rinse with water and dry with a disposable paper towel or hand dryer. If hand washing facilities are not available, or when hands are not visibly soiled, hand hygiene with 70 to 80 % alcohol-based handrub is an effective alternative;
- Cover your mouth and nose with tissue paper when sneezing or coughing. Dispose of soiled tissues into a lidded rubbish bin, then wash hands thoroughly; and
- When having respiratory symptoms, wear a surgical mask, refrain from work or attending class at school, avoid going to crowded places and seek medical advice promptly.
